APPLICATIONS

Freight twins

Module 10 · Urban freight and last-mile delivery

The last-mile problem

- Many small, time-critical deliveries
- Double parking and blocked lanes
- Emissions and noise in dense areas

A freight twin

Policies to test

- Loading zones and curb booking
- Micro-hubs with cargo bikes
- Delivery time windows
- Low-emission zones

Living labs: the LEAD project

- EU project, 2020–2023
- Living labs in six European cities
- Open tools and a free online course

Measure the whole street

Delivery time + street impact

Optimise for operators and for everyone else on the street
